Paragraph 494, Tariff Act Of 1913. Paragraph 494. - Glass plates or disks, rough cut or unwrought, for use in the manufacture of optical instruments, spectacles, and eyeglasses, and suitable only for such use; provided, however, that such disks exceeding eight inches in diameter may be polished sufficiently to enable the character of the glass to be determined. (Free of duty. Act of 1913.) Summary. Description. Optical glass, rough cut or unwrought, is the essential element in the manufacture of microscopes, field glasses, range finders, gun sights, photographic lenses, and other optical instruments. It is admitted into the United States free of duty. Up to the end of the year 1917, this glass was not manufactured in the United States and had been imported in its unwrought state, principally from Germany, where many new varieties had been developed after years of scientific research and experiment. It has been imported also from France and England. Optical glass in a finished state and as part of completed optical instruments is also free of duty, when such instruments are imported by educational institutions for their own use. Development Of A New Industry. The shutting out of German imports and the necessities of the Allied Governments soon exhausted the supply of optical glass in the United States. In 1917 scientists of the Carnegie Institution and the United States Bureau of Standards cooperated with four American manufacturers and succeeded in producing certain varieties of optical glass which met the requirements of the Army and Navy. These manufacturers have built and equipped factories for the...
