

Structure and Dynamics of Biomolecules: Neutron and Synchrotron Radiation for Condensed Matter Studies

Filesize: 6.23 MB

Reviews

It is one of the best books. Better than ever, though I am quite late in starting to read this one. You won't feel monotony at any moment of the time (that's what catalogues are for regarding in the event you check with me).
(Dr. Kristin Dickens)

STRUCTURE AND DYNAMICS OF BIOMOLECULES: NEUTRON AND SYNCHROTRON RADIATION FOR CONDENSED MATTER STUDIES

Oxford University Press, U.S.A., 2000. Hardcover. Book Condition: New. Dust Jacket Condition: Not Issued. 1st. Glossy hardcover. as new. 416pp including index. Profusely illustrated in color and b/w. This volume, the fourth in the HERCULES series, is the basis of the lecture course describing the theory and practice of techniques using either thermal neutrons or X-rays from a synchrotron source applied to the modern problems of biology. The themes treated are the crystallographic determination of protein structure, protein dynamics and partially ordered systems. A fourth section on more specialized topics includes spectroscopic techniques, X-ray microscopy, neutron spin polarization contrast methods and investigations of more complex molecules. Each chapter describes a different aspect of the subject, and the contributors are international authorities in their field. Size: 4to - over 9¾" - 12" tall. Science.
