Brand New Book ***** Print on Demand *****.Excerpt from Evolution and Man Natural Morality the Church of the Future, and Other Essays It is the serious duty of every rational human being to help make the earth a better and happier abiding place. This duty is imposed by the very nature of human existence - by the constructive and destructive influences which determine the weal and woe of humanity, individually and collectively. Knowledge, however circumscribed, pertaining to these natural influences, enabled primitive man to devise crude, though effective, ways of obtaining subsistence, and to defend himself against enemies threatening his wellbeing and his life. His participation in evolutionary processes resulted in contributions to the advancement that culminated, through successive generations, in civilizations more than a hundred thousand years later. Without these contributions evolutionary progress, humanly speaking, would have been impossible. In his struggle for existence, in his constructive efforts, man of the twentieth century encounters the same destructive influences, manifested in quite different ways, which beset his remote ancestors. Effects have always been just equal to the causes producing them; always will be. Those who hope to escape by chance the logical effects of causes deceive themselves and sooner or later pay the penalty of self-deception. Ignorance, credulity, injustice, intolerance and dishonesty continue to be prominent and potent among the destructive influences which interpose serious obstacles and dangers to the progress and safety of modern society.
