

RAMAN SPECTROSCOPY OF MASS-SELECTED METAL CLUSTERS IN AGRON MATRICES

Filesize: 6.26 MB

Reviews

A fresh eBook with a brand new standpoint. It can be rally exciting throgh looking at period of time. I am delighted to inform you that this is the greatest book i have read through during my individual existence and may be he very best publication for ever.

RAMAN SPECTROSCOPY OF MASS-SELECTED METAL CLUSTERS IN AGRON MATRICES

[DOWNLOAD PDF](#)

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Fundamentals and Applications | This book emphasizes the importance of fundamentals and applications of Raman and Absorption spectroscopy for the transition metal clusters, the desire to understand the frontier between molecular chemistry and solid state physics, as well as to gain new insight into the chemical properties of the metal surfaces used in heterogeneous catalysis is one of the motivations for the extensive work done on metal clusters. Absorption and Resonance Raman spectroscopy is employed to interrogate mass-selected metal clusters in argon matrices. Neutralized cluster samples are interrogated by absorption, excitation, fluorescence and Raman spectroscopy. The information about the geometry, electronic and vibrational structures, dissociation energies and force constants are determined from resonance Raman spectroscopy, absorption and Raman excitation profiles which turned out to be a very useful and fruitful method to assign all the optical transitions involved in each metal clusters. | Format: Paperback | Language/Sprache: english | 419 gr | 220x150x16 mm | 304 pp.
